ABSTRACT

This project is a web based social media like other existing social media (Facebook, twitter etc.). The project objective is to make people aware of the different kind of disaster happening in this world through relief fund portal.

This project is an attempt to provide the advantages of transferring funds to people who are in need. It helps people or user by notifying any current event's (disaster) through their account i.e. notification section or through others post's. Every states will have a user called a government user or simply an organization of government sector. This organization will post the user that are in concern with that specific disaster by providing names and detail description of the disaster.

User can also post for help if it is needed but the post will be taken down by admin if mismatched found with the organization posted name i.e. for particular region. This system can be used by every person provided they need to register with certain credential.
